UPM Web Browser Platform Support Policy

As per the ZINFI UPM Software technical support policies, users must remain on a supported environment – including applications and platforms – to receive technical support.

Benefits of using Updated Browsers

- **Security** - Latest security patches and security features that allow you to browse safely.
- **Comfort & better experience** - Latest features that browser developers add to make enrich your browsing experience.
- **Compatibility** - Improves compatibility often with more modern web standards and languages like HTML5, CSS, and Javascript, which is why some sites might not render properly or at all on outdated browsers.
- **Speed** - Every new browser generation improves speed.

Web Browsers Supported

Platform	Chrome	Firefox	Safari	MS Edge	MS IE 11
Android	Supported	Not Supported	N/A	N/A	N/A
iOS	Supported	Not Supported	Supported	N/A	N/A
Mac OS	Supported	Supported	Supported	N/A	N/A
Windows	Supported	Supported	N/A	Supported	Supported till (Date)

Notes

1. We support two latest stable production release of the supported browsers. So users should update their browsers frequently.
2. Beta versions of the browsers are not supported.
3. Any supported browser that you choose to use must meet the following requirements:
 - a. Javascript is enabled
 - b. Cookies are enabled
4. Not all features are available in mobile browsers due to complexities of the software UI.
